NEW · PAIDFAST ON WHATSAPP

Run your business from WhatsApp.

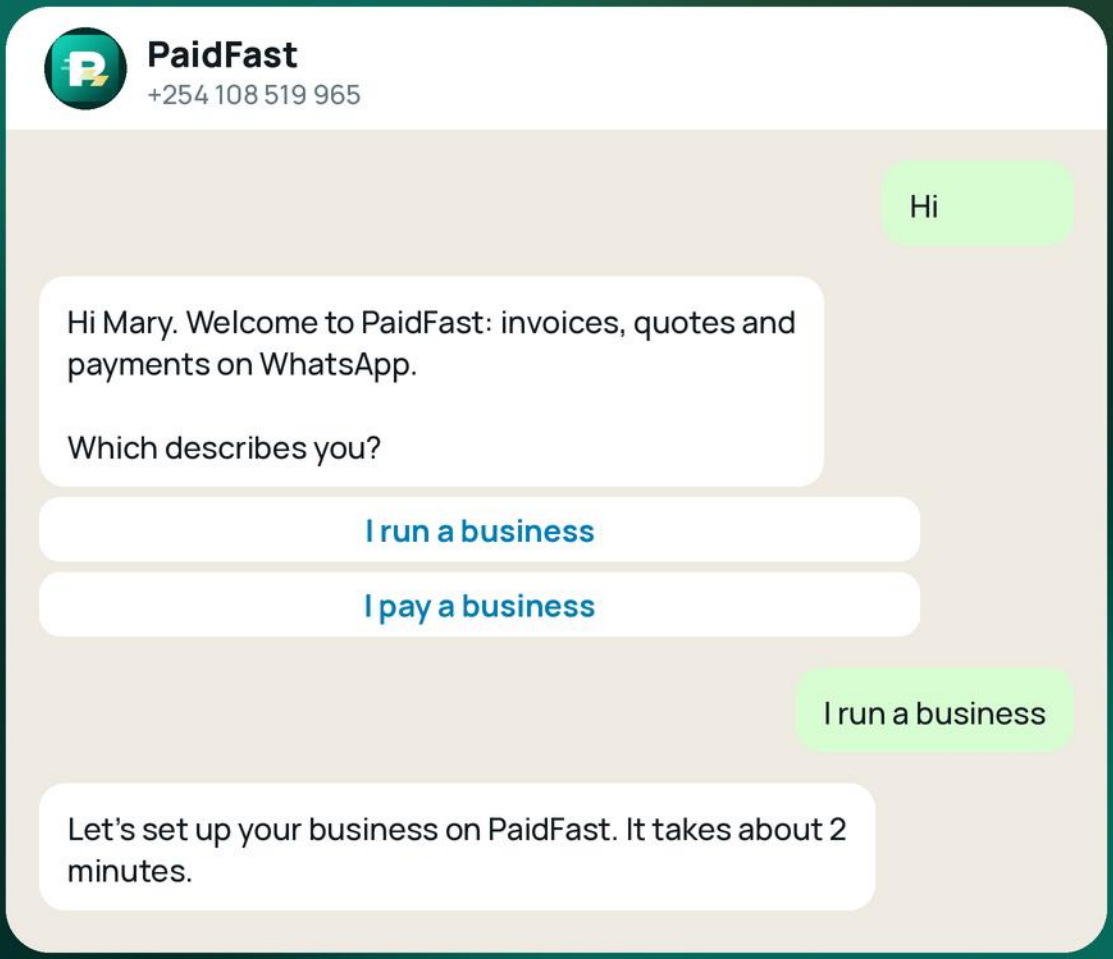

Sign up, invoice, quote, remind and send statements, all from one chat. No laptop needed.

9 things you can do

Swipe →

01 · SIGN UP

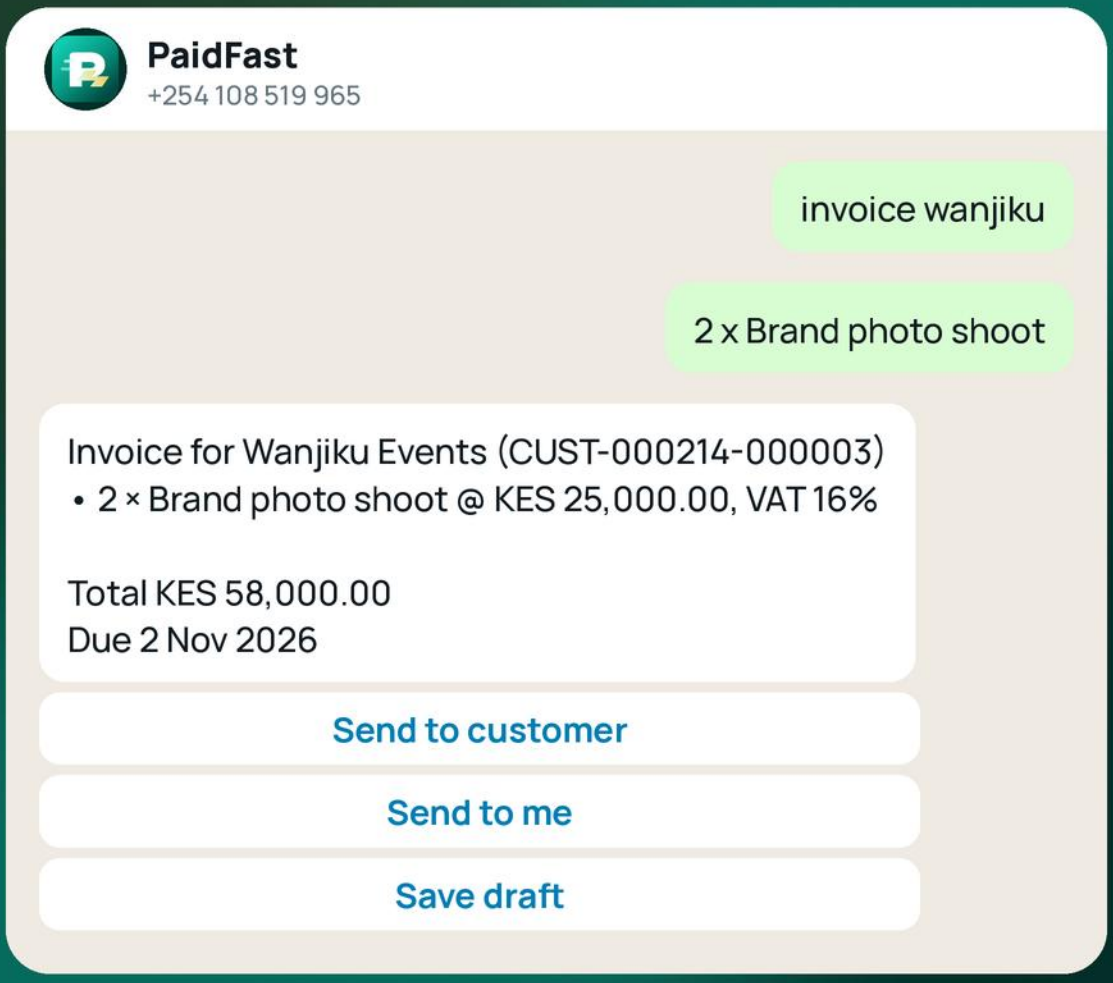

Sign up in about 2 minutes

Say Hi, tap I run a business, and answer a few questions: business name, country, your name and email.

02 · INVOICE

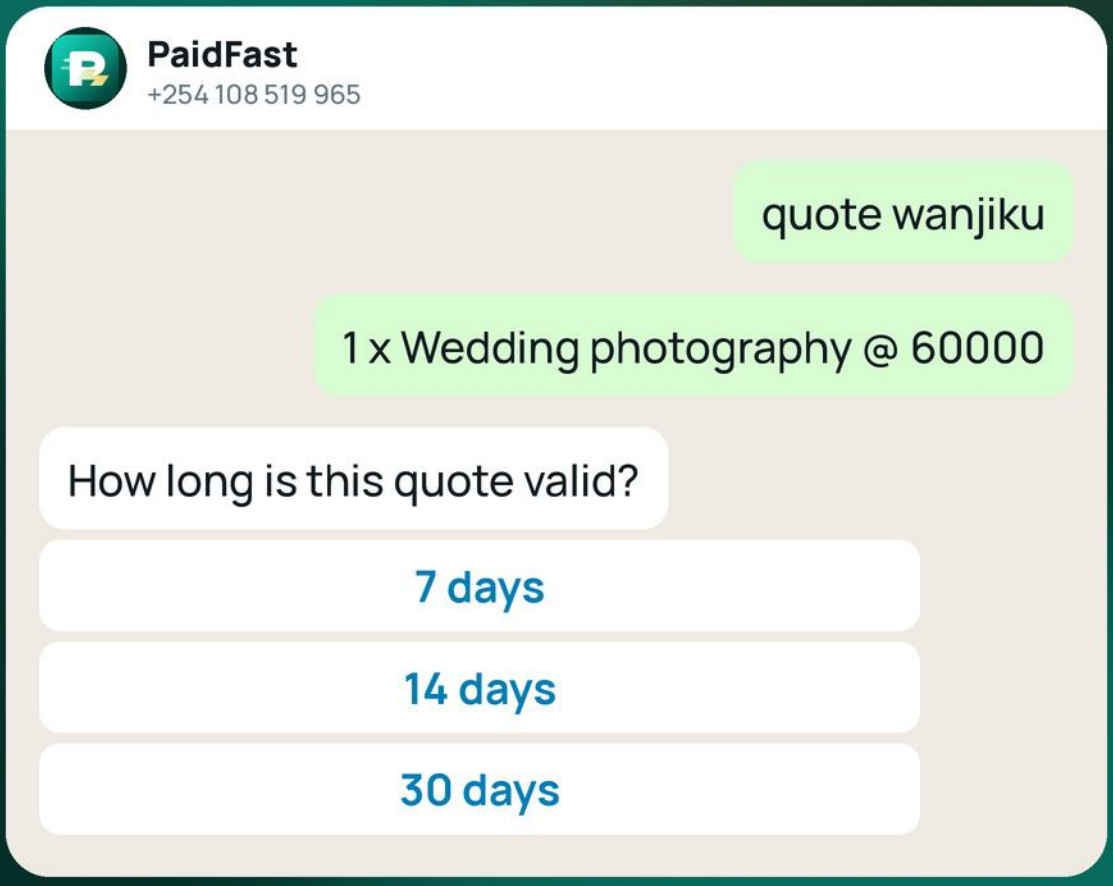

Create and send an invoice

Type invoice, pick the customer and add items from your price list. It goes out by WhatsApp and email.

03 · QUOTE

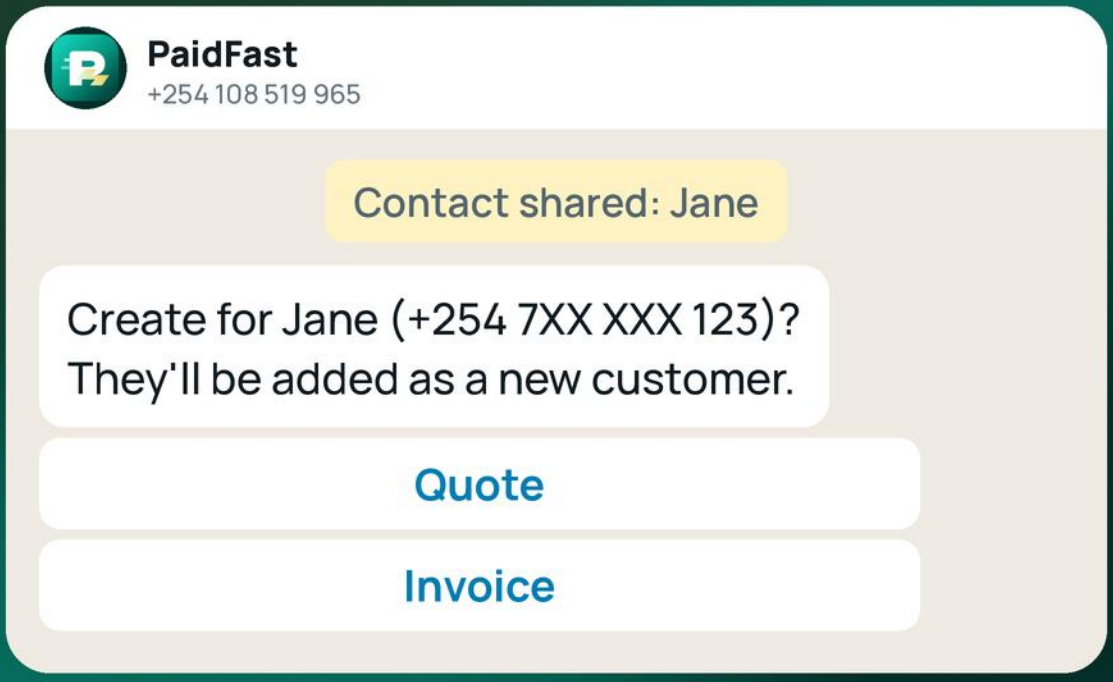

Send a quote

Same steps as an invoice. Choose how long it is valid, then send it to your customer.

04 · WHO YOU'RE CHATTING WITH

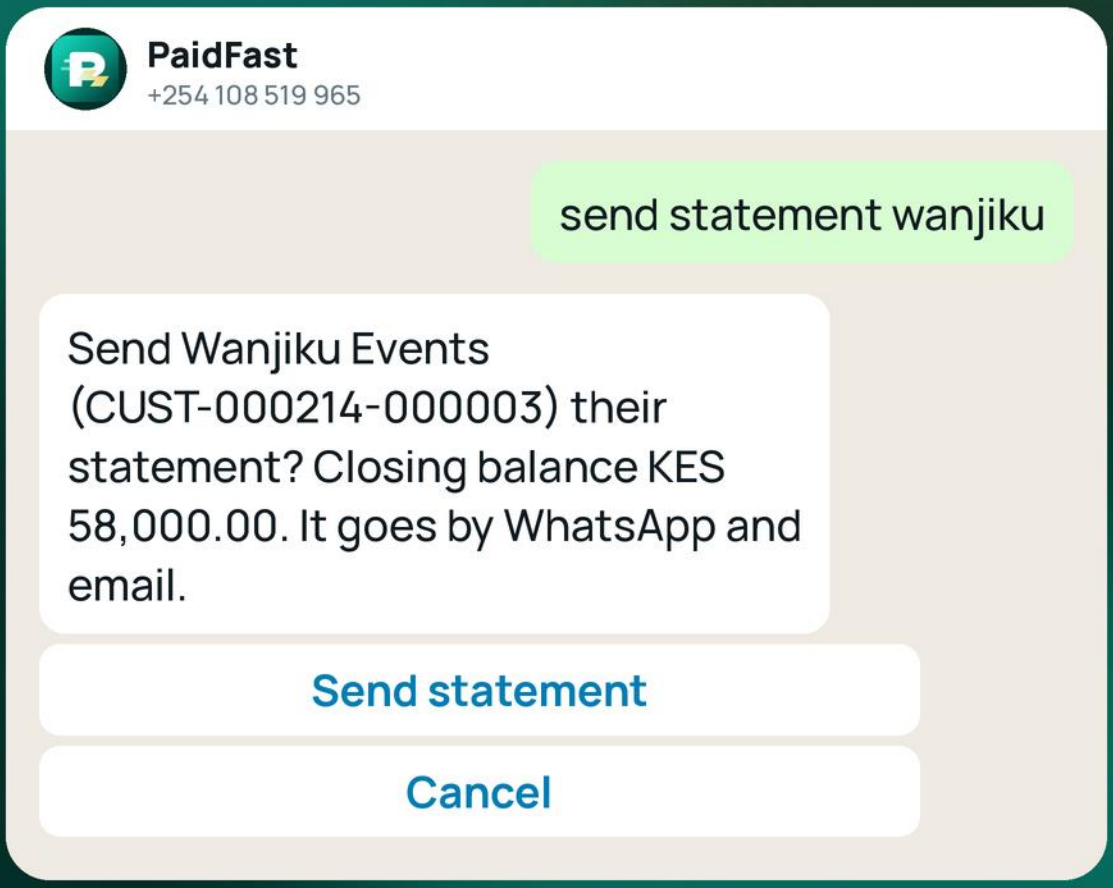

Quote from a shared contact

Agreeing a deal on your own WhatsApp? Share the contact with PaidFast and tap Quote or Invoice.

05 · STATEMENT

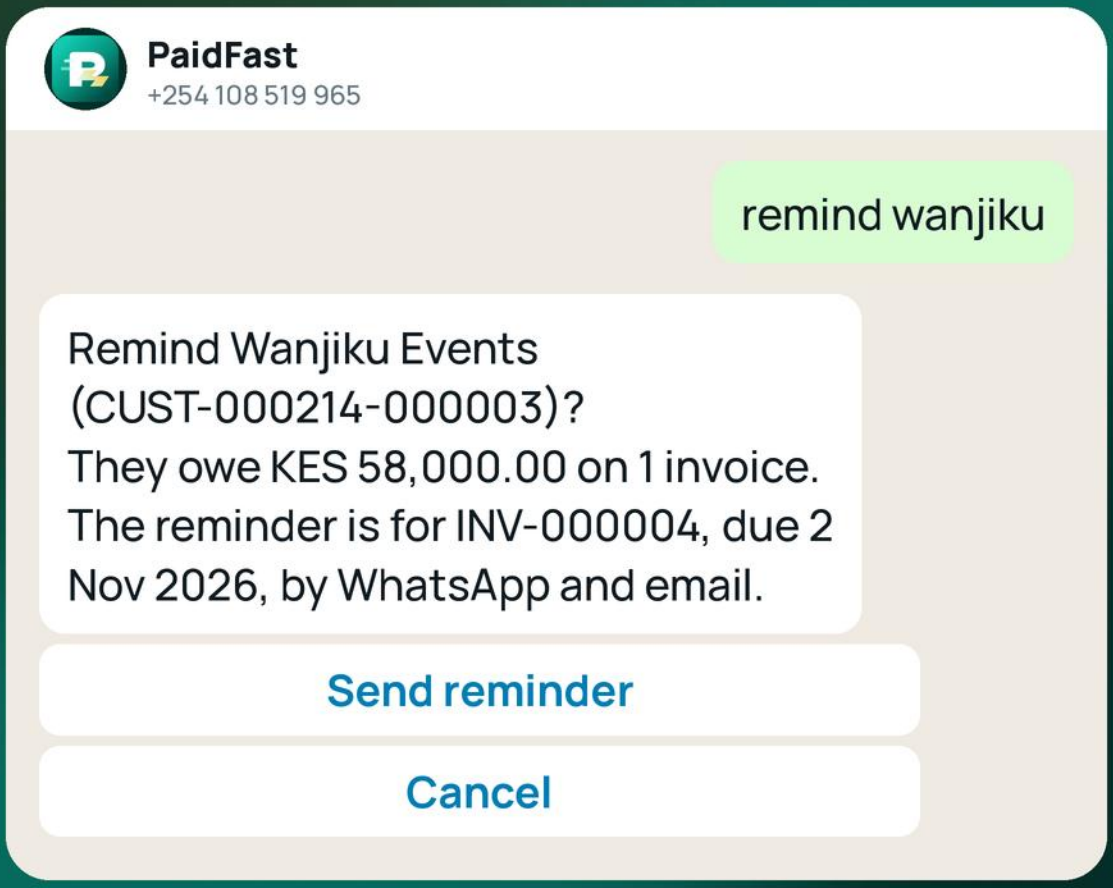

Send a statement

One message sends your customer their full account statement, with the PDF.

06 · REMINDERS

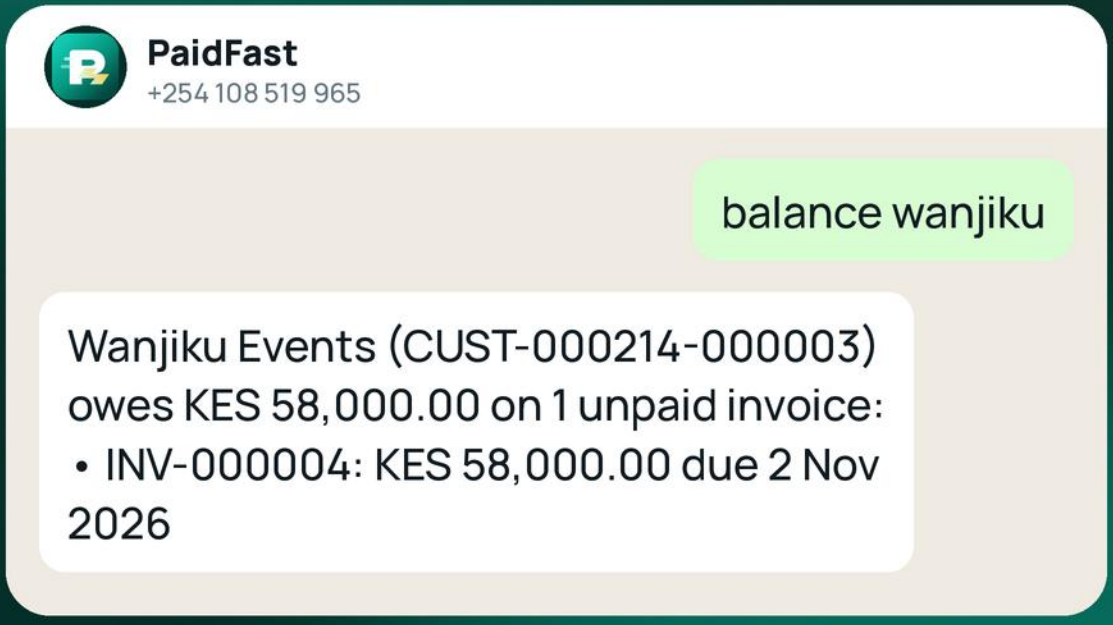

Remind one, or everyone

Or type remind all to remind every customer who owes you, each for their oldest unpaid invoice.

07 · BALANCE

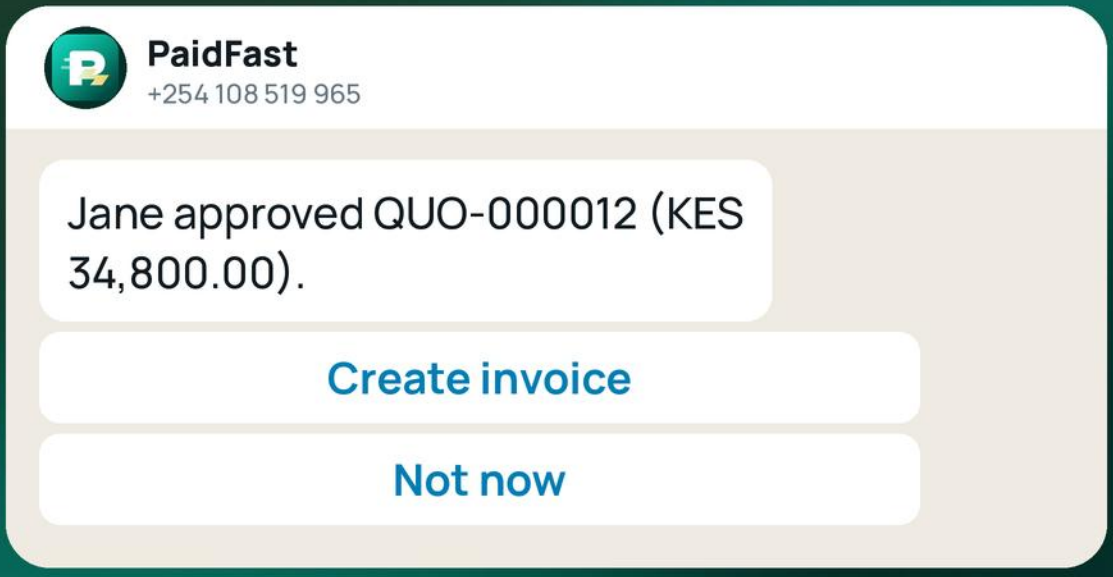

Check what a customer owes

A quick look before you call. It changes nothing.

08 · QUOTE APPROVED

Approved? Invoice in one tap

When a customer approves your quote, PaidFast tells you here. Tap Create invoice to bill them with the same items.

09 · YOUR CUSTOMERS TOO

Your customers can help themselves

BALANCE	See what they owe you
STATEMENT	Get their statement
PAY	Pay an open invoice in the chat
QUOTE ...	Ask you for a quotation
APPROVE	Approve a quote you sent

They message the same PaidFast number. Before sharing balances or payment links, PaidFast checks the number really belongs to them.
